Want to improve your child care center’s finances?  
Sign-up for the Early Childhood Education Fiscal Hub today!

What is the Fiscal Hub?
Public Health Management Corporation (PHMC), Reinvestment Fund, and CoMetrics partnered to develop the Fiscal Hub in 2017 to improve the financial stability of early childhood education (ECE) providers in Philadelphia.

During this pilot, we created:
- an online tool for providers to clearly see their financial data, identify areas of risk, and understand how they are performing compared to peers; and
- ECE industry standards which suggest targets that enable providers to track financial performance and make more informed business decisions.

What will I get for being a part of the Fiscal Hub?
In addition to receiving up to a $250 gift card, you will receive access to the online tool and technical assistance to improve your business management practices and align to industry standards using actionable strategies to improve your child care operations.

How can I participate?
1) Email FiscalHub@phmc.org to sign-up. Eligible providers must have at least one location in Philadelphia. We are primarily seeking child care centers; however, there may be limited availability for family and group providers.

2) You will then be asked to:
   - Submit your organization’s taxes for FY 2016 and 2017; and
   - Complete a questionnaire to provide additional financial and programmatic information about your organization.

“The tool gives lots of comparative information that I don't have access to. The information provided through the tool provides a vehicle for conversations with my board.”

Fiscal Hub participant
Snapshots from the online tool

- Identify your performance trends over time.

![ECE Fiscal Hub Trends](image)

- Benchmark your performance against top performing peers. Identify the financial gap to operate at the top performers’ level.
